

Christian “Nate” McIlvenny

Summary

Full-Stack Software Developer. Love learning new technologies and finding ways to utilize them for personal projects. Was self-taught for 4-6 months and later enrolled in a full-stack coding Bootcamp and I build applications for clients.

EXPERIENCE

POP Umai - Freelance (<https://github.com/PreDevz/POP-Umai>) Aug-Sept 2022

Worked with a small team to develop a full-stack application for a local business, POP Umai.

- Laid out and updated each member's current tasks on the project board while collaborating and keeping the code flow smooth.

- Worked on backend Rest API routes, and created the cookies and session to have an administration system for our client.

The application uses Node.js, Express, MySQL, Sequelize, Handlebars.js, Bootstrap, and is deployed on Heroku.

PROJECTS

N8 Tech Blog (<https://github.com/TDGNate/Tech-Blog>)

Sept 2022

Full-Stack CMS-style blog site where developers can publish their blogs and add comments on others. Users can also view all their posts and commentaries along with having access to update/delete their posts/comments from their dashboard.

Technologies and Tools: Handlebars.js, Bootstrap, Node.js, Express.js, MySQL, Sequelize (ORM), express-session, SweetAlert, Fontawesome

Platello (<https://github.com/PreDevz/Platello>)

June 2022

Web application that takes user's input of cuisines and drinks they desire, that could also exclude specific ingredients if they list what they want to exclude. We used 2 APIs (Spoonacular and CocktailDB) to make specific user requests. After selections, 3 generated dishes and drinks will appear with their recipe, ingredients, and cooking time.

Tools: Materialize, JQuery, APIs, Localstorage

EDUCATION

University of California, Riverside (UCR) Extension Bootcamp,
Riverside CA — *Certificated*

May 2022 - Oct 2022

Successfully completed full-stack software engineering program

Orange Vista High School, Perris CA — Diploma

Aug 2017 - May 2021

Perris, CA 92571

(951) 591-3493

TECHNICAL SKILLS

Languages/Frameworks:

- JavaScript (ES6)
- JQuery
- React.js
- Nuxt.js
- Node.js
- Express.js
- MySQL
- MongoDB
- Bootstrap
- SASS
- Materialize
- HTML5/CSS3

Tools:

- Git and Github
- NPM
- Heroku
- Insomnia
- MVC
- Sequelize (ORM)
- Inquirer
- Mysql2
- Handlebars.js
- RESTful APIs

SKILLS

- Problem-solving
- Very passionate about learning new technologies
- Productive and a collaborative team player

AWARDS

First Degree Black Belt Successfully completed all series leading to black belt awarded by American TaeKwondo Associations (ATA) in November of 2017
