Christian “Nate” McIlvenny

Mechanical Engineering Student | Programming + Creative Technology

Perris, CA • (951) 591-3493 • itsnzte@gmail.com • GitHub: TDGNate • LinkedIn: christian-mcilvenny • natemci.com

ABOUT

Mechanical Engineering student with a creative technical background in coding, robotics, game development, and digital media. I enjoy building things with a team, solving practical problems, and learning tools that connect software with real-world design. I’m dependable, adaptable, and comfortable communicating with others.

EXPERIENCE

Independent Game Dev & Technology Projects | *Unreal Engine*
Created interactive digital projects using Verse (coding language), Unreal Engine tools, gameplay logic, asset creation, and video/photo editing. Built, tested, and improved games, and promoted published projects through different platforms that earned around $7K through user engagement while learning how to advertise.

Student Web & Coding Projects | *UCR Bootcamp + Personal Projects*
Built responsive web pages, small applications, and team-based websites for two client-style projects using core web tools such as HTML, CSS, JavaScript, and JSON. Worked with classmates and small teams to organize tasks, troubleshoot code, communicate progress, and complete projects.

Campus Robotics & Team Projects | *California Baptist University*
Collaborated on small robotics builds using simple programming, LEGO-based mechanical design, testing, and team problem-solving. Contributed ideas, helped adjust designs during challenges, and supported the team during competition-style projects.

EDUCATION

California Baptist University (CBU) | Mechanical Engineering
Current student focused on engineering fundamentals, robotics, teamwork, and hands-on technical problem solving.

University of California, Riverside - Coding Bootcamp | Certificate
Completed full-stack software training with exposure to web development, team coding projects, GitHub workflows, and client-style project work.

SKILLS

- HTML, CSS, JavaScript, JSON
- Basic programming logic
- Verse basics for Unreal Engine
- Photo and video editing
- Small robot building and testing

STRENGTHS

- Team-oriented
- Communicator
- Creative builder mindset
- Comfortable learning new tools
- Patient

HIGHLIGHTS

- 1st place and 2nd place in CBU Freshmen robotics competitions
- Built and promoted online game projects
- Helped create full websites for two clients
- First Degree Black Belt, ATA at age 14
